

IMPORTANT NOTICE:

Beyond this point, clicking the “continue” button will take viewers to a separate Internet domain operated by Strategy Exchange LLC rather than Interconti Ltd. As the information portrayed on the Strategy Exchange domain is so extensive, we emphasize that Interconti has not verified each data set independently although we do believe them to emanate from reliable source(s). As such, we neither can, nor do guarantee the accuracy of the information the user is about to view. We suggest viewers who find items of particular interest so indicate to Interconti Ltd., so that we may apply our *best efforts* to perform reasonable due diligence to said selections with an eye toward managing the selection process to match the end-user’s temperament, risk tolerance and other criteria surrounding his/her best interests.

The performance numbers shown in the following documents represent hypothetical analyses of trading signals generated as the computer algorithms making up the purveyor’s program(s) have been applied to actual historical market data.

It is important to note that hypothetical results carry inherent limitations in that they are prepared with benefit of hindsight and lack the impact of true financial risk. That being said, hypothetical results do offer investors the ability to evaluate a system's or trader's concepts absent the mechanical vagaries of order entry and the relative success rate generated by the chosen order entry methodology (measured as a percentage of successful versus unsuccessful fills). The documents under discussion are therefore presented for informational purposes only and thus represent neither a solicitation to buy nor an offer to sell on behalf of either Interconti Ltd., its officers or agents.

As regards Futures, Options, Cash Currencies, Derivatives and indeed leveraged transactions of any type, the risk of loss can be substantial, therefore only "risk capital" should be used. Such products are not suitable investment vehicles for everyone. The valuation of said leveraged vehicles may fluctuate and as a result, clients may lose more than the amount originally invested and may be required to pay more later. Consider carefully your financial position before deciding to either invest or trade.

WITH REGARD TO ALL INVESTMENT PERFORMANCE INFORMATION, USERS SHOULD NEVER LOSE SIGHT THAT PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS.
